## **DETAILED ACTION**

### ***Response to Arguments***

1. Applicant's arguments with respect to claims 1-6 have been considered but are moot in view of the new ground(s) of rejection.

### ***Drawings***

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

2. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the "first light guide member and second light guide being in one body and the joint portion for connecting the first and second light guide members together" must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claim 1 is rejected under 35 U.S.C. 112, second paragraph, as being incomplete for omitting essential structural cooperative relationships of elements, such omission amounting to a gap between the necessary structural connections. See MPEP § 2172.01. The omitted structural cooperative relationships are:

3. It is not clear how the utility effect or operation is undertaking between the irradiation portion adapted to apply the light, the reflecting portion, the interior of the hollow portion and the light guide member. How the radiating portion does apply the light when the light is a radiation.

***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Art Unit: 2875

2. Claim 1 is rejected under 35 U.S.C. 102(e) as being anticipated by Matumoto(U.S.6302551).

Matumoto('551) discloses a meter for vehicle having:

Regarding claim 1, a pointer (24) adapted to be turned around a rotary shaft (23), a display member (60) positioned on a rear side of the pointer (24) and adapted to be transmission illuminated, light sources (81,82,83) positioned on a rear side of the display member (60) and in the vicinity of the rotary shaft (23) and adapted to illuminate the display member (60), a reflector (70/71) positioned on the rear side of the display member (60) and provided with a reflecting portion, and a light guide member (60) positioned on the rear side of the display member and adapted to guide the light from the light sources (81,28,83) to the rear side of the display member, characterized in that a hollow portion is formed between a rear surface of the display member (20) and reflector (70/71), an irradiation portion (183) adapted to apply the light (82/83), which is reflected on the reflecting portion (70/71) and illuminates the display member, to the interior of the hollow portion being provided on the light guide member (60/61).

***Allowable Subject Matter***

3. Claims 2-6 are allowed.

The following is a statement of reasons for the indication of allowable subject matter: the prior art of record neither teach a first light guide member adapted to guide the light from the first light sources to the pointer, and a second light guide member positioned

Art Unit: 2875

on the rear side of the display member and adapted to guide the light from the second light sources to the rear side of the display member, characterized in that the first light guide member and second light guide member are formed in one body.
